Proprietary solutions

# All-in-one

**Building management software for  
medium-sized and enterprise building  
automation projects**

**NETx Multi Protocol Server**

Building automation  
systems are  
heterogeneous

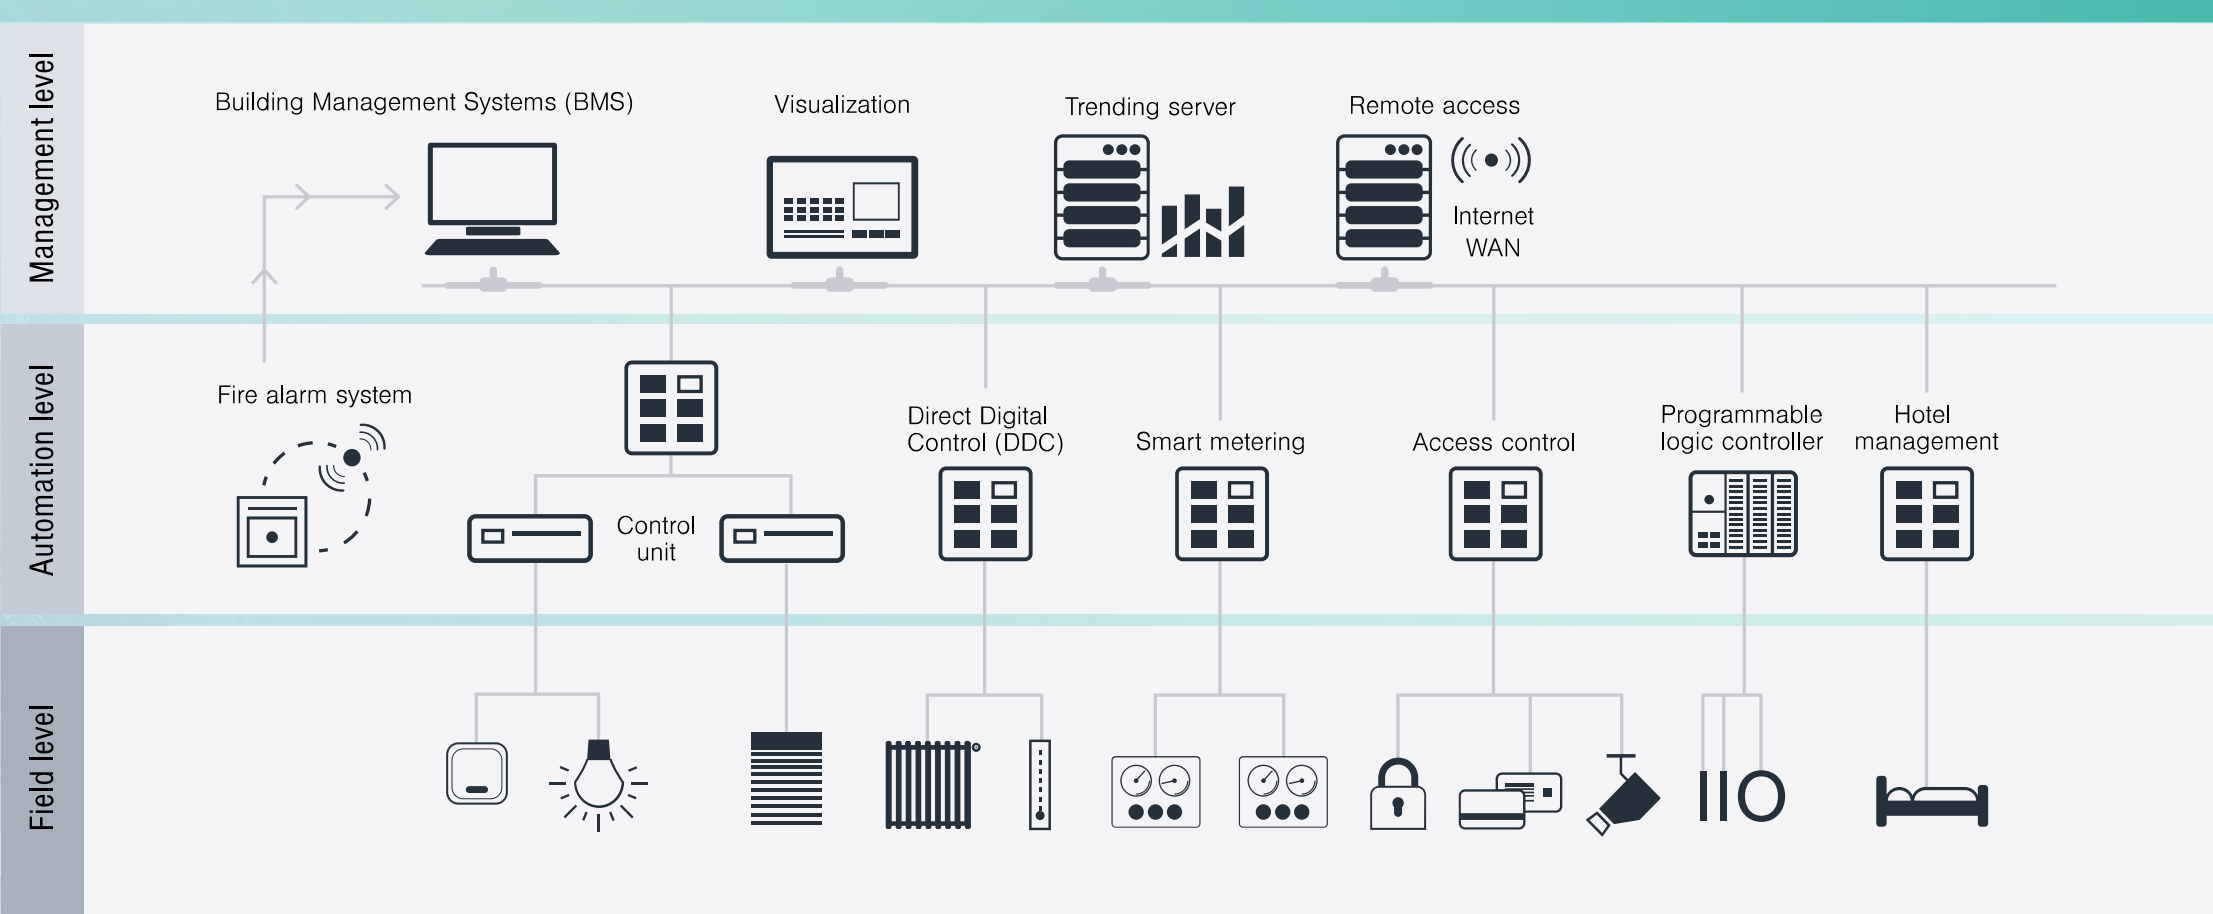

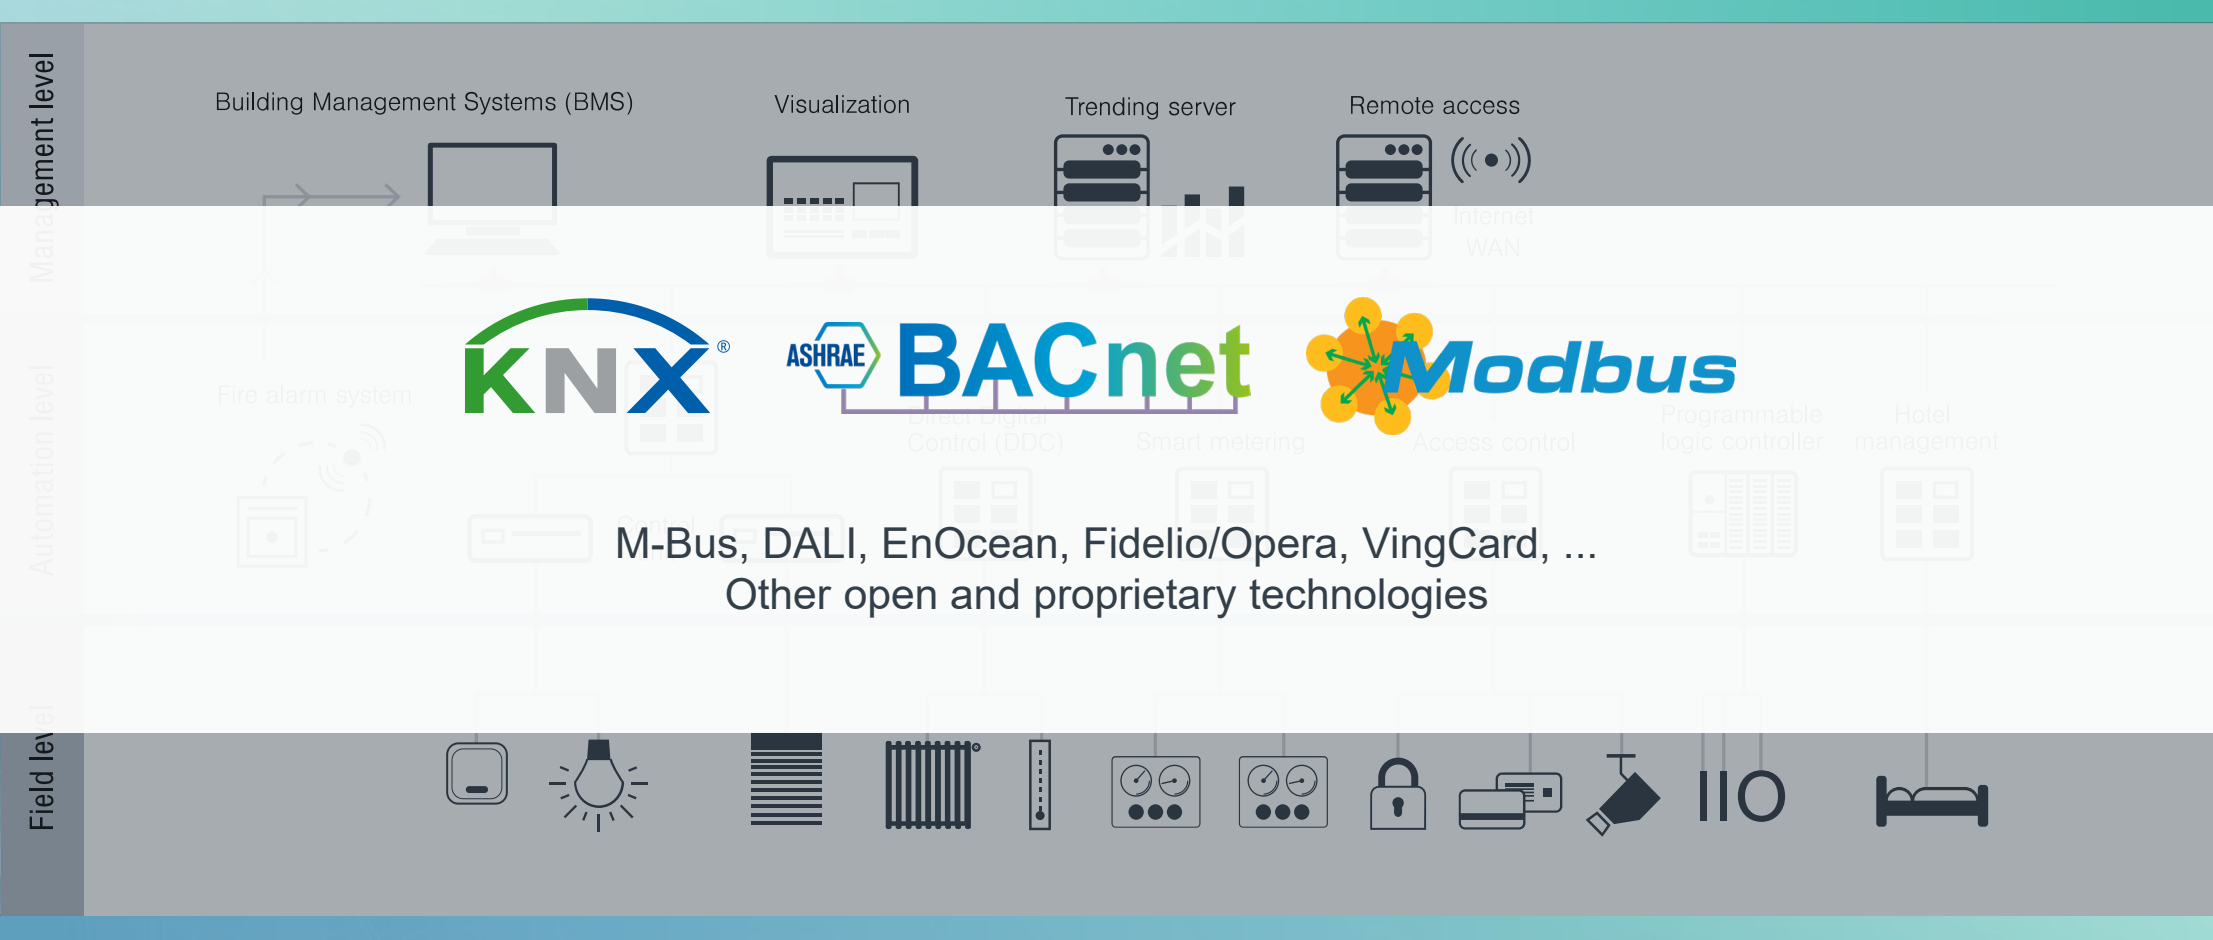

Many different  
technologies  
are used

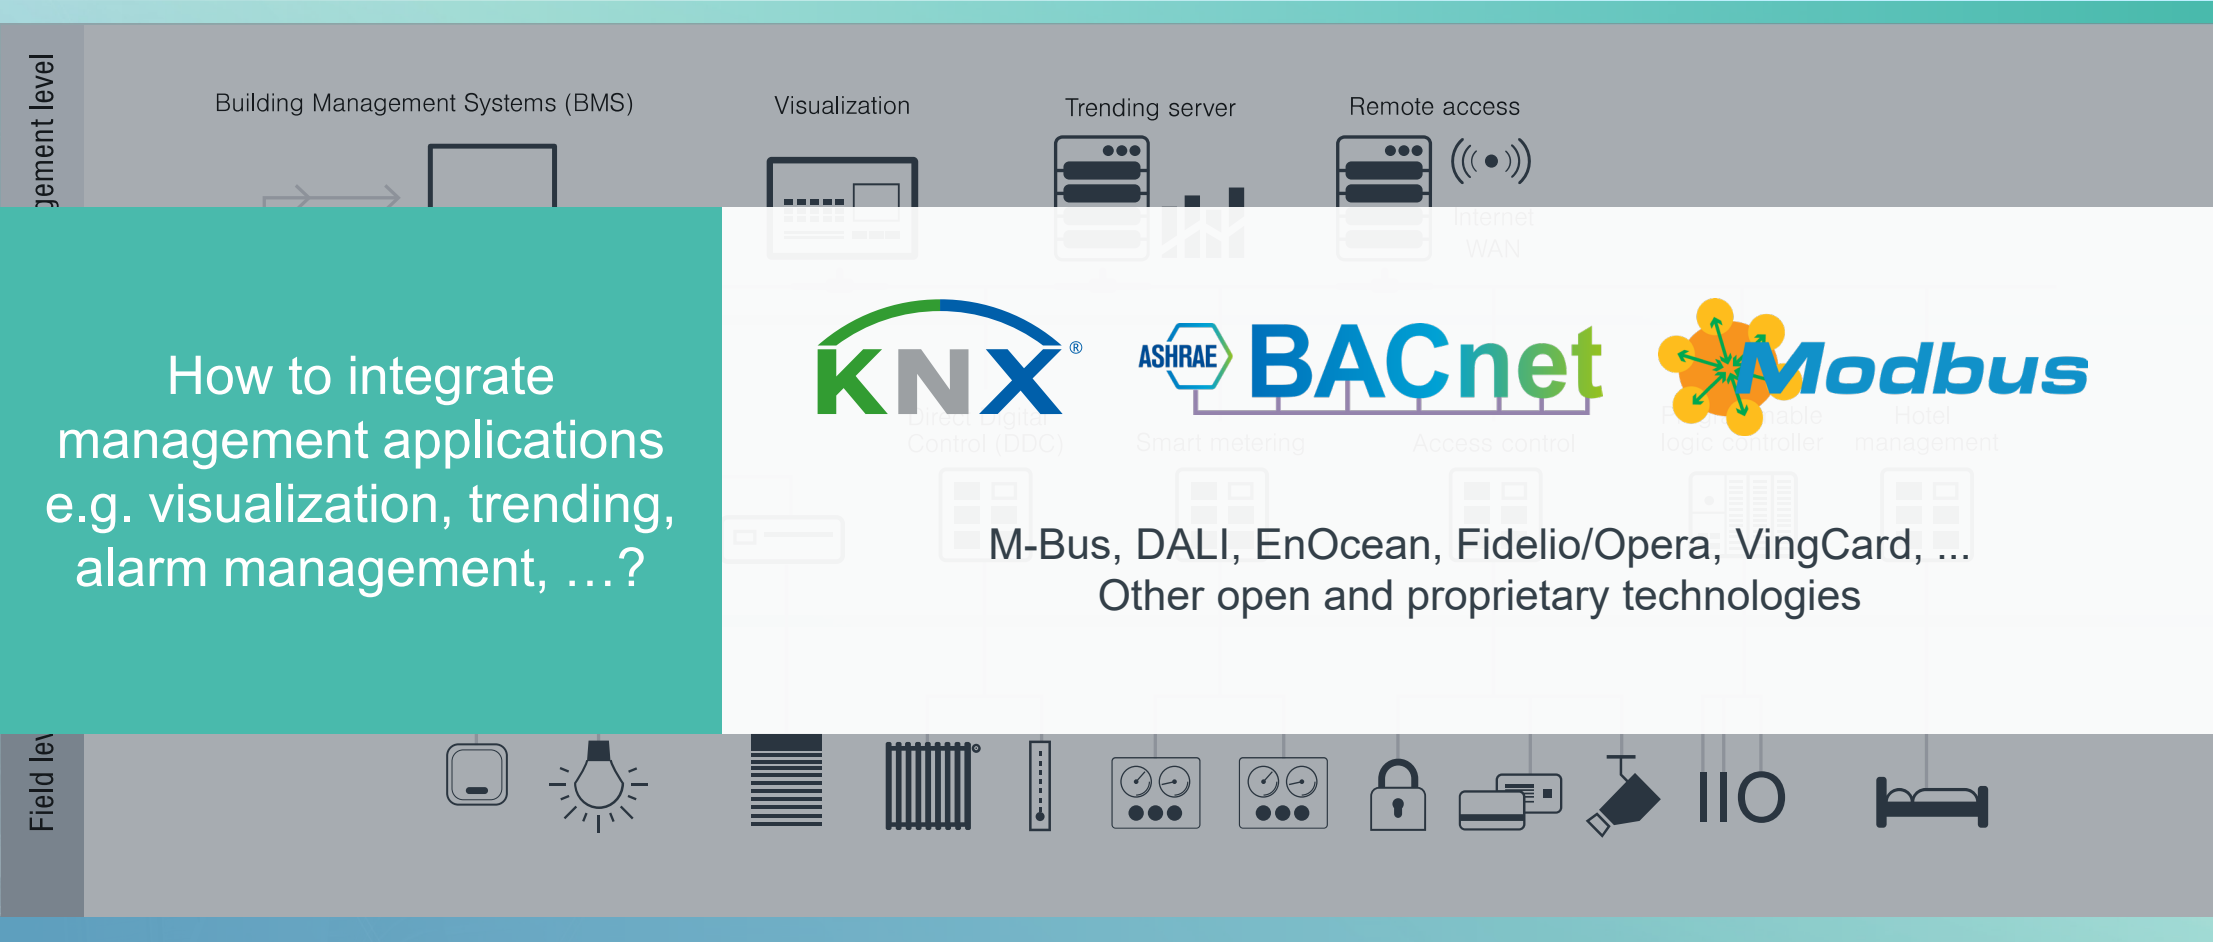

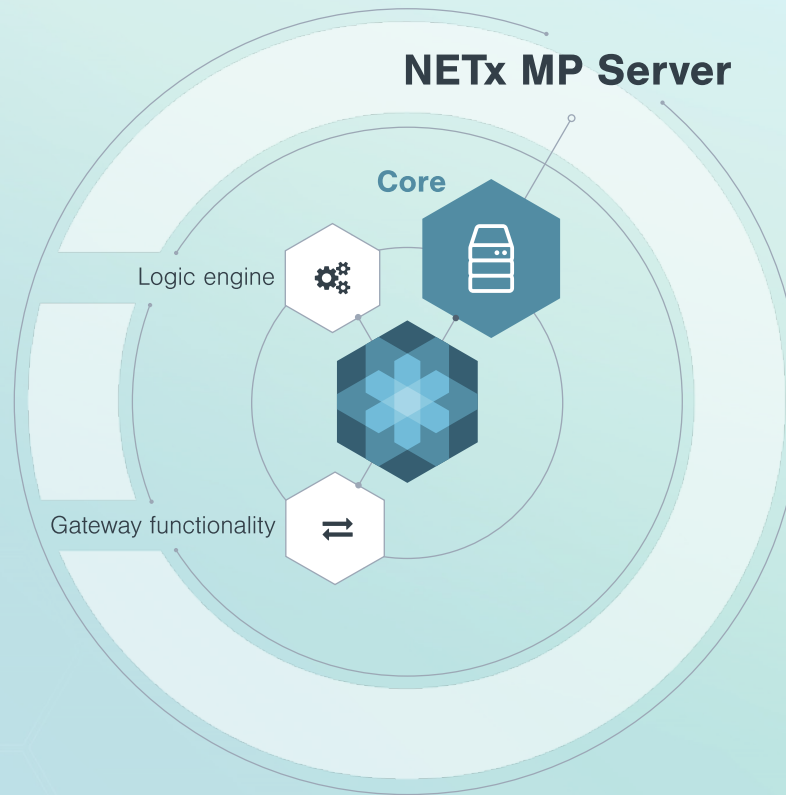

Each technology  
has its characteristics  
and its own way to  
represent and process  
control data

Successor product  
of  
NETx KNX OPC  
Server 3.5

Upgrade from  
NETx MP Server to  
NETx BMS Platform  
possible

## Operating system - Windows based operating system required

Windows 10 / Windows 11

Windows Server 2016 / Windows Server 2019 / Windows Server 2022

For maintainable systems we strongly recommend at least Windows 10 or Windows Server 2016 (or higher), except NETx KNX OPC Server 3.5. Our products basically also run on older Windows versions down to Windows 7 and Windows Server 2008. However, due to limited future support for these operating systems by Microsoft we will not be able to provide full support for our software running on these systems.

## Hardware

Any device that supports Microsoft Windows can be used

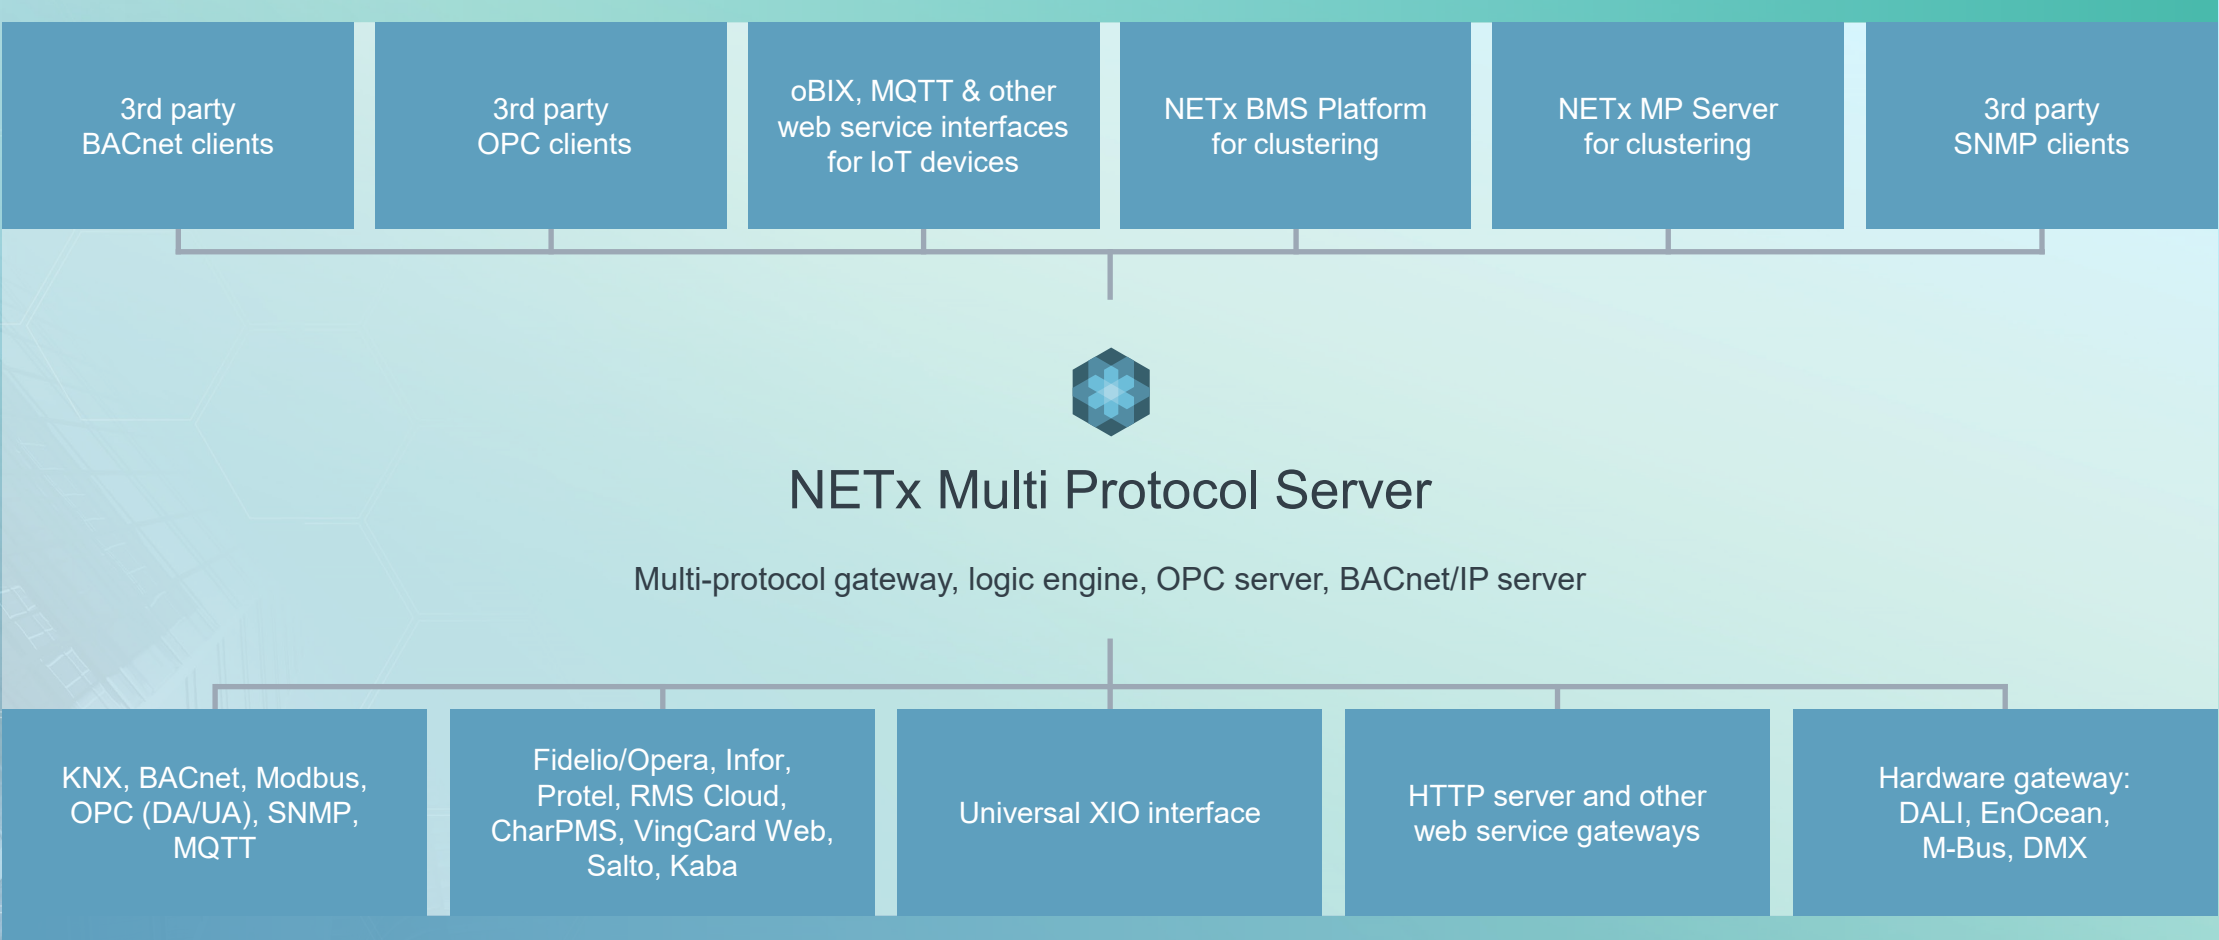

Use of virtualization environments possible

Requirements depend on project size  
(small embedded device up to server systems)

VMWare, Virtualbox, Hyper-V, ...

| License   |  |   |
|---|--|---|
| Number of data points   |  | Optional: additional license fees for special modules and interfaces  |

| Licensing process   |  |   |
| Hardlock  | Softlock   |   |
| USB Dongle<br>hardware independent  | Unlock code<br>dependent on hardware<br>and operating system |   |

# NETx Multi Protocol Server

## Interfaces to the field level

|   |  |   |
|---|--|---|
| Open and standard protocols                     | Hotel management system  | Door lock systems                         |
| KNX, BACnet, Modbus,<br>SNMP, OPC (DA/UA), MQTT | Fidelio/Opera, Infor, Protel, RMS Cloud,<br>CharPMS, VingCard Web, Salto, Kaba | VingCard, Kaba, Salto                     |
| HTTP Server and other<br>Web Service Gateways   | Develop your<br>own interface  | Customer specific<br>interface on request |

## Interfaces to the management level

OPC

OPC DA 2.0 and OPC UA

BACnet

BACnet/IP server

MQTT

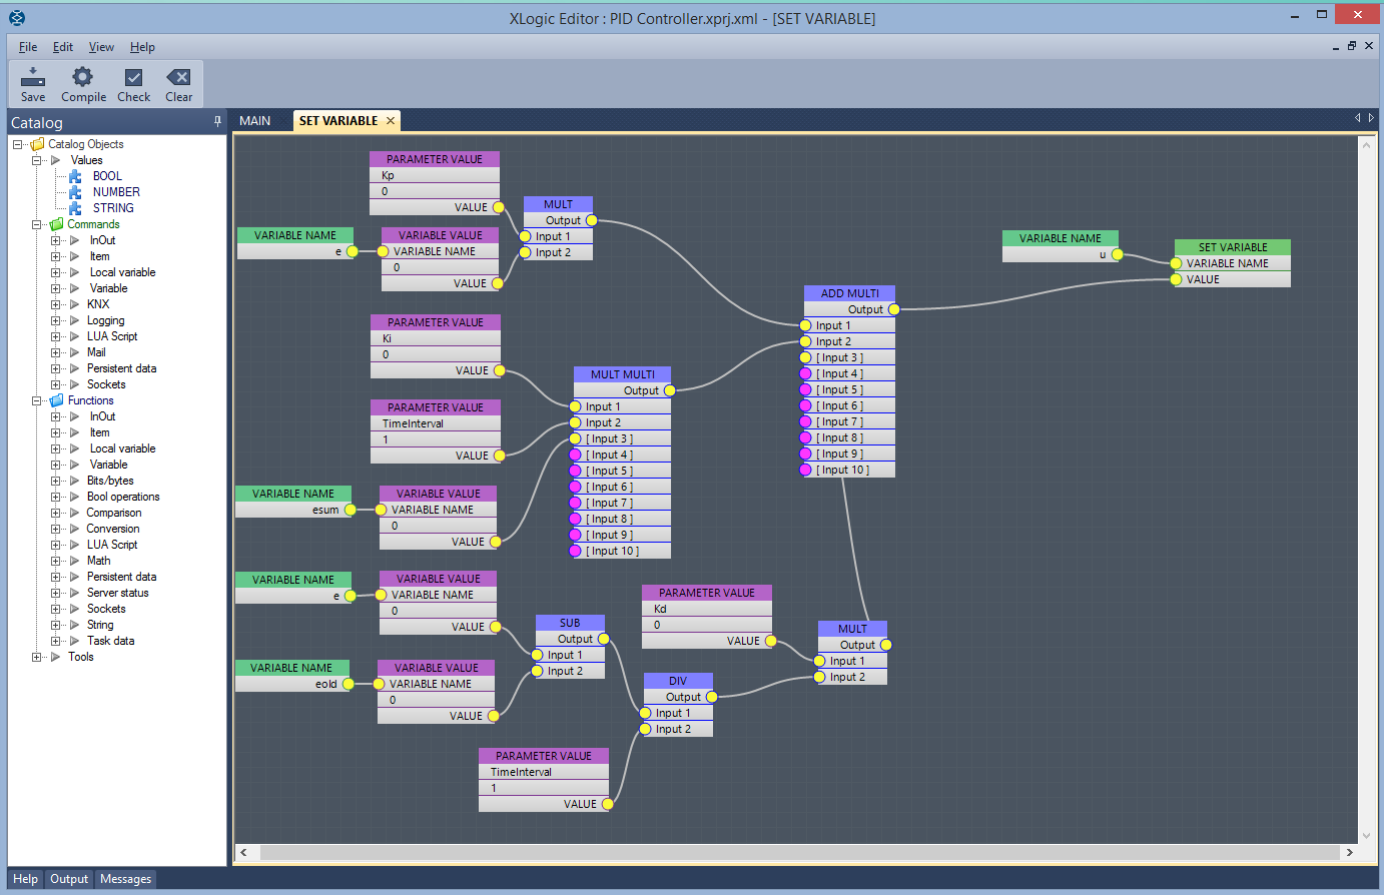

Communication to one or more MQTT brokers

oBIX and other Web  
Service interfaces for IoT

oBIX 1.1 and KNX Web Services

## Integration of 3rd party systems

| Integration of OPC clients | Integration of BACnet clients   | Integration of OPC servers   |
|----------------------------|---|--|
| 3rd party clients          | 3rd party BMS systems from Siemens, Schneider Electric, Honeywell, Sauter | Fire detection systems, elevators, etc. with different proprietary systems |

Adding control functions that are missing within the field devices

Adding control functions that are distributed across devices that use different technologies

XLogic editor: graphical functional block programming

LUA scripts: script engine
