

Processor: VBA Scripts

Example

```
if Inputs(1) = 0 then
    Outputs(1) = 1234
else
    Outputs(1) = Inputs(2) * 2
    msgbox "Hello World"
end if
```

NETx Funktionen:

```
APP.GetRootPath() As String
APP.GetWorkspaceName() As String
APP.GetCurrentUserName() As String
APP.LoginUser(ByVal vUserName As String, ByVal vPassword As String)
APP.UpdateCurrentUser()
APP.GetCurrentPageID() As String
APP.GetPageName(vID As String) As String
APP.GetPagesCount() As Long
APP.GetHomePageID() As String
APP.GetPageIDByIndex(vIndex As Long) As String
APP.GetPageIDByName(vName As String) As String
APP.GotoHomePage() As Boolean
APP.GoPageForward() As Boolean
APP.GoPageBack() As Boolean
APP.GotoPage(vID As String) As Boolean
APP.GetCurrentLayerID() As String
APP.GetLayerName(vID As String) As String
APP.GetLayersCount() As Long
APP.GetLayerIDByIndex(vIndex As Long) As String
APP.GetLayerIDByName(vName As String) As String
APP.IsLayerVisible(vID As String) As Boolean
APP.IsLayerEnabled(vID As String) As Boolean
APP.ShowLayer(vID As String) As Boolean
APP.HideLayer(vID As String) As Boolean
APP.EnableLayer(vID As String) As Boolean
APP.DisableLayer(vID As String) As Boolean
APP.SceneExists(vName As String) As Boolean
APP.IsSceneEnabled(vName As String) As Boolean
APP.PlayScene(vName As String) As Boolean
```

APP.SaveScene(vName As String) As Boolean

APP.EnableScene(vName As String) As Boolean

APP.DisableScene(vName As String) As Boolean

APP.ShowInfo(ByVal vModule As String, vData As Variant, Optional ByVal vShowDialog As Boolean = False)

APP.ShowWarning(ByVal vModule As String, ByVal vData As Variant, Optional ByVal vShowDialog As Boolean = False, Optional ByVal vShowPopup As Boolean = False)

APP.ShowError(ByVal vModule As String, ByVal vData As Variant, Optional ByVal vShowDialog As Boolean = False, Optional ByVal vShowPopup As Boolean = False)

APP.SendEmail(ByVal vMailTo As String, ByVal vMailSubject As String, ByVal vMailMessage As String)

APP.PlayWAV(ByVal vFileName As String)

APP.PlayAlarmSound()

APP.ItemProperty(vItemID As String, vPropertyID As Long) As Variant

APP.ItemDescription(vItemID As String, vPropertyID As Long) As String

APP.ItemValue(vItemID As String) As Variant

APP.GetLayerIDByIndex(vIndex As Long) As String

APP.GetLayerIDByName(vName As String) As String

APP.ShowLayer(vID As String)

APP.HideLayer(vID As String)

APP.EnableLayer(vID As String)

APP.DisableLayer(vID As String)

APP.IsLayerVisible(vID As String) As boolean
